## About Us

In 2022, Department of Physiotherapy, Faculty of Health Sciences, Universitas Muhammadiyah Surakarta is proud to host an international virtual symposium and call for paper called the Academic Physiotherapy Conferences 2022 (APC 2022). We hope such work will be an essential mechanism for the innovation of research. This symposium should provide a forum for graduate students, teachers, and physical therapist to disseminate the information obtained from research and to create a further national and international research network in the field of physical therapy.

# International Virtual Symposium Seminar

## THEME

The theme of this international seminar is “An interdisciplinary Approaches to Evaluation, Reconstruction and Rehabilitation of Knee Meniscus Injury”

## OVERVIEW

Meniscus injuries are often seen in athletes because of a sports injury and represent approximately 15% of all cases sports injuries. In the modern era, rehabilitation after sports injury has become a domain for specialists, and its evolution has necessarily brought together the including medical doctor, orthopedic surgeon, biomechanical experts, physiotherapist, strength and conditioning coach, and sport nutritionist. The interdisciplinary team continues to provide more combined knowledge and skill, clinical expertise, sensitivity, compassion and understanding for individuals with disabilities or injuries. The individual team members each bring a unique perspective and expertise to the collective planning of the group. But them shares similar goals for the patients.
